Summary

I'm a design-oriented, front-end-focused web developer who builds modern, responsive web sites and applications. I am driven by an insatiable thirst for knowledge, a need to constantly challenge myself, and a desire to produce work that is cleanly coded and focused on usability.

Front End Skills & Technologies

- Expertise in Hand-written, standard-compliant HTML, CSS and Javascript
- Familiar with popular CSS preprocessors, with a preference for BEM-flavored SCSS
- Solid JavaScript and jQuery experience. Familiarity with MVC/MV* frameworks: Angular.js the most and Backbone.js and Ember.js to a lesser extent.
- Experience in building Mobile-first optimized, responsive layouts
- Experience configuring complex build processes using Gulp and Grunt, including sprite sheet building, image compression, preprocessor compilation, and file optimization.
- Solid understanding of Test Driven Development and Behavior Driven Development
- Solid understanding of Object Oriented Programming principals
- Adobe Creative Suite, strongest in Photoshop

Backend Skills & Technologies

- Familiar with version control tools including Git, Subversion.
- Familiar with PostgreSQL, MySQL, MongoDB, SQLite database systems
- Comfortable within Ruby dev environment, Ruby on Rails & Sinatra frameworks
- Comfortable within PHP dev environment, WordPress, Laravel, Codeigniter
- Comfortable within Javascript dev environment, Node.js, NPM, Express
- Familiar with Agile principals; Comfortable working in an iterative environment
- Solid understanding of REST APIs and service oriented architectures.
- Experience provisioning LEMP/LAMP environments on Ubuntu servers
- Heroku / AWS / Digital Ocean / cloud deployment platforms

Relevant Experience

Software Engineer at Doejo, LLC - February 2013 to Present

- Full-stack web development in a fast-paced agency environment
- Developed custom web solutions on various platforms; Ruby on Rails, WordPress.
- Consulted with sales team on technical recommendations for outgoing proposals.
- Maintained legacy projects as issues arose.

Freelance Web Developer - March 2012 to February 2013

As contracted Web Developer for Mopix, Inc - December 2012
- Assisted in front-end build-out of client facing e-commerce site for independent movie distribution startup, formerly FilmBaby.
- Assisted in designing aspects of service-oriented API.

As contracted Web Developer for The Dachis Group - July 2012 to February 2013
- Built and maintained Sinatra-based Facebook Applications for high-profile brands including Disney, Discover Card, Allstate, US Cellular, Dos Equis.
- Helped maintain the in-house app boilerplate codebase.

As contracted Web Developer for RockitShips.com - March 2012 to February 2013
- Developed logo and branding concepts highlighting ecological focus of client.
- Designed and developed custom website / MailChimp integration

Web Designer at Homes.com / Homes Media Solutions
January 2010 to March 2012
- Worked hand-on with client to develop personalized templates
- Set the coding standards and authored templates used by the department.
- Organized and conducted departmental training in CSS3, JavaScript & jQuery.
- Expanded my role by streamlining the design process and as a result came in more than 125% over my projected revenue on several occasions.
- Revamped the design gallery to include more modern designs.
- Technologies used: HTML, CSS, ASP, JavaScript, jQuery, Photoshop.
